

The Gasser

Week of February 12, 2018 World Understanding Awareness Month District 7330, Club 5241

Last week we heard from Ed Valentas of Huntley and Huntley Land Development of the gas and shale well industry, Marcellus and Utica. A bit of research about them is below (page two). Members had a lot of questions and he was also talking about many careers available in the area. **Jim Walko** won the raffle and donated it to Polio, maybe because **Pat Shaffer** was sitting at his table. **Pat Shaffer** gave a moment for the Foundation. **Ruth Wepfer** had a guest, Brian Thomasini, a pharmacist at the VA, and they sat by **Jim Walko!** **Ruth Wepfer** gave an update on the Night at the Races and **Lane Neff** on the basket auction.

**THE FOUR WAY TEST
OF ALL THE THINGS
WE THINK, SAY,
AND DO:**

1. Is it the **TRUTH?**
2. Is it **FAIR** to all concerned?
3. Will it build **GOODWILL** and better friendship?
4. Will it be **BENEFICIAL** to all concerned?

Over 100 Years of Smart Oil and Natural Gas Development

commitment is to the safe and environmentally sound development of our assets to maximize the benefit to all stakeholders in the process.

Huntley & Huntley is a privately-owned oil and natural gas exploration and production company headquartered in suburban Pittsburgh. We hold both conventional and unconventional hydrocarbon interests, as well as various mineral rights and royalty interests, throughout the United States.

Our success comes from over a century of aligning our business interests with those of landowners, local interest holders, and community leaders -- particularly regarding the safety and protection of our shared environment. By committing to best-in-class practices, the company has successfully drilled, completed, and produced wells in challenging environments throughout the world. Today, it is especially satisfying to be developing the Marcellus Shale play in Southwestern Pennsylvania, within the very neighborhoods where we raise our own families. Our
